## EXTRA INFORMATION + MOTIVATION

Why am I looking for a job in Portugal, Lissabon?

Portugal feels like my second home because I have been spending my holidays in Portugal since I was seven years old. It was inevitable that I would come to love Portugal. Because I love Portugal so much, my goal is to communicate in its native language as well. After finishing my master's degree (Work and Organizational Psychology), and in the anticipation of the world opening up soon, I want to pursue a professional career and take on the challenges of living and working abroad at the same time.

When? I am looking for a job starting from the first of September 2021.
